Building on Sustainability

The **NUMATIC SUSTAINABILITY FORMULA** is the foundation to all our product development and sustainable initiatives.

Built to Last

Our products are built to last with tried, tested and trusted designs, ongoing innovations and a commitment to developing sustainable cleaning solutions.

Efficiency

We ensure our products are the most efficient for every user; from water and detergent usage to electricity consumption.

Serviceability

Our products are designed to be easily and economically serviced throughout their lifecycle. We commit to support every product we have ever made, since day one.

Recycling

We are committed to developing products using high-quality, recycled plastic. Right from their initial design, our products are manufactured to be easily recycled at the end of their life.

Disposal

We work hard to ensure zero waste goes to landfill and have achieved this since 2017.

INTEGRATED SUSTAINABILITY

A sustainable approach is integrated throughout all of our operations, from design to manufacturing, to distribution and when in use. Our teams always strive to innovate and introduce even more sustainable manufacturing practices at our 42 acre site in Somerset, United Kingdom.

"Net Zero by 2035"

We recognise the need and demand for sustainable cleaning solutions and commit to initiatives across our business.

This includes becoming Net Zero by 2035 (for Scope 1 and 2) by setting incremental targets to keep us on track. We have also signed up to the Science Based Targets Initiative (SBTi), setting ambitious emissions reduction targets in line with the latest climate science.

While we work on reducing our emissions, we have taken additional measures to reduce our impact on the planet by carbon balancing our Scope 1 and 2 emissions through our trusted offsetting partner C Level.

Sustainability in Action

Achieving ambitious sustainability targets requires innovation, action and transparency. These initiatives move us forward in reaching our goals and leading the way in providing sustainable cleaning solutions for our customers.

Sustainability is broader than just reducing our carbon footprint. True sustainability is helping others to be sustainable in their everyday practices, ensuring the earth and its communities are cared for.
